Hi Virginia and Dayna,

I'm sorry I was out of the office when you called me yesterday. I understand that you spoke with Victor and he relayed that you were interested in an update on EPA's next steps at the CFAC site.

I want to emphasize that the process is currently moving forward. As you are aware, we are accepting public comments regarding the proposed listing, which is a step in the NPL process to ensure the opportunity for public involvement and input.

Regarding next steps specific to investigation, generally in the Superfund program, as we've discussed in the past, EPA will look to negotiate with the Potentially Responsible Parties (PRPs) to complete the Remedial Investigation and Feasibility Study (RI/FS) as part of a legally binding agreement under EPA oversight. The EPA intends to follow this track at this site as well. Specifically at the CFAC site, EPA intends to send a notice of liability to the PRPs along with a statement of work which details the work needed to complete the RI/FS at the site. EPA intends that this notice will lead to additional discussions regarding the RI/FS work at the site. The exact timing for this notice is not certain at the moment, but I hope to be able to provide more information within the next week or so.

I want to reiterate EPA's shared interest in working efficiently at this site given the community and the site owners' desire to investigate, remediate and potentially redevelop the site. Please feel free to let me know if you have any questions.

Thanks,
Rob

Victor,

Thanks for the conversation this afternoon about the proposed priority listing for the CFAC site.

I'm attaching Dayna Swanson's contact information.

Sen. Tester is anxious to get this process moving forward. The sooner we start the quicker we can get that site repurposed and folks working.

Please keep us posted as you negotiate through this process.

My best.

Virginia Sloan
